

GABRIEL WYATT™

ACTOR / ARTIST / INVENTOR / THINKER

GABRIEL WYATT

“Another door opened in my mind. In that moment, I understood my purpose with clarity - and felt a singular drive to pursue it.”

01 / ORIGIN

Gabriel Wyatt, born Antonio Lee Hernandez in Atlanta and raised in College Park, Georgia, is an actor, artist, inventor, and thinker with English and Puerto Rican heritage. Wyatt spent 25 years working in legal and compliance. His work now spans technology, philanthropy, fashion, performance, and creative direction, with a particular commitment to creating opportunities for autism awareness and authentic representation within the entertainment industry.

02 / PATTERN

During the COVID-19 pandemic, Wyatt discovered he was on the autism spectrum - what was historically described as Asperger’s syndrome - giving context to a lifetime of intensely visual, analytical, and pattern-driven thinking.

03 / THRESHOLD

In 2026, after an eight-month battle with cancer and three rounds of chemotherapy, Wyatt developed septic shock, leading to a seven-minute cardiac arrest and a near-death experience. After surviving sepsis, he was diagnosed with acquired savant syndrome, a rare phenomenon in which exceptional abilities emerge following neurological injury or illness. He describes an ensuing outpouring of information, geometry, art, patterns, ideas, and empathy.

04 / PURPOSE

The experience deepened his relationship with God and “magnetized” his understanding of life, drive, and purpose. Today, those experiences inform work shaped by faith, kindness, curiosity, and a determination to make a meaningful impact on others.
